INDEX

AUTHORS

Abramson, Samuel, 257
Alexander, Dorothy F., 639
Alture-Werber, E., 599
Anigstein, Ludwik, 381
Augustson, Gustaf F., 381

Bader, Madero N., 381
Bagg, Josephine V., 559
Bartholomew, J. W., 567
Beal, Grace A., 382
Beamer, William D., 259
Bellamy, W. D., 191
Blundell, George P., 259
Bohls, S. W., 382
Bond, G., 673
Boné, R., 439
Borman, Earle K., 351
Braun, W., 45
Brooks, R. F., 295
Bruno, M. M., 255
Bucher, Carl J., 258
Bugie, Elizabeth, 527
Burdon, Kenneth L., 380
Burkholder, Paul R., 385
Burroughs, A. L., 609
Bushnell, L. D., 219

Campbell, J. J. R., 71, 455
Cannon, Paul R., 257
Carle, B. N., 45
Caroline, Leona, 179, 243
Chapman, George H., 113, 555
Christensen, C. W., 256
Church, Charles F., 122
Ciminera, J. L., 258
Clark, Phyllis, 261
Coffin, S. Farnum, 261
Coghill, Robert D., 639
Conklin, R. L., 119
Conn, H. J., 262
Conn, Jean E., 531
Cooke, W. R., 383
Crouch, Ruth W., 259
Culbertson, C. G., 119
Curtis, S. F., 382

Darby, C. W., 255
Day, Harry G., 119
Devignat, R., 491
Dewhirst, W. H., Jr., 45
Diachun, Stephen, 122
Dienes, Louis, 125
Drea, W. F., 547
Dubin, I. N., 313
Dunham, Wolcott B., 121

Earle, Walter C., 120
Eaton, M. D., 45
Eldering, Grace, 257
Epstein, Jeanne A., 393
Evans, Alice C., 263, 267
Ewing, William H., 703

Fabian, F. W., 1
Felsenfeld, Oscar, 155
Fischer, E., 439
Foley, E. J., 393
Fong, Jacob, 379
Foster, Jackson W., 97, 260
Frampton, Vernon L., 537
Fugazzatto, Paul, 257
Fulton, MacDonald, 382

Gainey, P. L., 285, 689
Gaw, H. Zanyin, 483
Geiger, Walton B., 531
Goetchius, G. R., 683
Grathwohl, G., 256
Green, Morris N., 496, 615, 623, 631
Greisen, Elizabeth C., 515
Griffin, A. M., 114
Gunsalus, I. C., 71, 191, 261, 455, 515, 611

Haas, H. F., 219
Haberman, Sol, 381
Hajna, A. A., 609
Hamann, C. B., 123
Hammon, W. McD., 382
Hamre, Dorothy M., 121
Harris, John O., 689
Harrison, Preston E., 382
Haynes, Edith, 119
Haynes, W. C., 262
Heidelberger, Michael, 259
Henle, Gertrude, 258
Henle, Werner, 258
Herrick, J. Arthur, 331
Hildebrand, E. M., 537

Hill, J. M., 381
Hodges, John H., 259
Hofer, Alvin W., 697
Hoffmann, O., 439
Holdenried, Robert, 609
Hollaender, Alexander, 447
Hoover, Sam R., 159
Hoyt, Robert E., 380
Hubbard, Roger S., 612
Hucker, G. J., 262, 295
Hungate, R. E., 380, 499

Irish, Oliver J., 429
Irons, J. V., 382

Jacobs, S. E., 579
Johnson, Frank H., 260
Jones, Helen P., 121
Jordan, R. C., 579
Joslyn, D. A., 256

Karow, Edward O., 260
Kashdan, Florence, 599
Katznelson, H., 495
Kempf, G. F., 119
Kempf, J. Emerson, 331
Kendrick, Pearl, 257
Ketchum, Helen M., 119
Kirby, William M. M., 603
Kleczkowska, J., 673
Kleczkowski, A., 661
Knighton, Holmes T., 124
Konde, W. N., 255
Koprowski, Hilary, 463
Kringle, Priscilla, 383
Kurtz, P. L., 119

Lakey, Calvin, 381
Lamberti, Thomas, 612
Lankford, C. E., 383
Lankford, L. L., 383
Lawrence, C. A., 683
Lee, S. W., 393
Lennette, Edwin H., 463
Levine, M. G., 380
Levine, Max, 383
Lewin, Isaac, 260
Libby, Raymond L., 401
Locke, Arthur, 77
Lockwood, Lewis B., 413
Loewe, Leo, 599
Lurie, Max B., 257
Lyday, Victor I., 429

McCarter, Janet R., 479
McClung, L. S., 119
McCormack, R. B., 121
McCoy, Elizabeth, 31
McKee, Clara M., 121
McVeigh, Ilda, 385
Main, Edna R., 77
Mallmann, W. L., 255
Marcuse, Hazel Scott, 380
Mayer, Rudolf L., 93, 337
Mohlman, Floyd W., 120
Moore, Fred, 380
Moyer, Dorothy, 385
Mundt, J. O., 1

Naghski, Joseph, 159
Nelson, Everett A., 255
Nelson, F. E., 473
Neter, Erwin, 253, 261, 612
Niven, C. F., Jr., 611
Nutman, P. S., 673

Offutt, Edward P., 262
Oliphant, John W., 447
Orr, J. H., 233

Pearson, Harold E., 369
Pederson, Carl S., 559
Perlman, David, 116
Petrik, Frank G., 347
Pettijohn, O. Glenn, 413
Pike, Robert M., 382
Plaut, Gerhard, 121
Pollard, M., 381
Porter, Keith R., 83
Portwood, Lucile, 255
Powell, H. M., 119
Powelson, Dorothy M., 479
Prado, E., 439
Price, Alison H., 259
Prince, Homer, 380

Rahn, Otto, 262
Rake, Geoffrey, 121
Rantz, Lowell A., 603
Raper, Kenneth B., 639
Reback, John, 120
Reed, G. B., 233
Reed, R. W., 233
Reeves, W. C., 382
Reimann, Hobart A., 259
Rice, R. E., 119
Robbins, Mary Louise, 114
Roepke, Raymond R., 401

Rosenblatt, Philip, 599
Ross, O. A., 677
Rustigian, Robert, 497, 498

Sage, Dorothy N., 258
Sahyun, Melville, 255
Salle, A. J., 379
Sanborn, J. R., 211
Schade, Arthur L., 179, 243
Scherp, Henry W., 260, 261
Schlingman, A. S., 256
Sevag, M. G., 496, 615, 623, 631, 677
Sharp, D. G., 313
Sherman, J. M., 262, 611
Sims, A. L., 579
Skeggs, Helen R., 117
Small, Margaret H., 401
Smith, William E., 125
Soule, Malcolm, 257
Spiegelberg, C. H., 13
Stafseth, H. J., 257
Stark, W. H., 123
Stimpert, F. D., 257
Stokes, J. L., 201
Strawinski, R. J., 258
Stuart, C. A., 351, 497, 498
Svec, Muriel Harden, 31

Teah, Bernard, 120
Thom, Charles, 120
Thomas, A. R., 383
Thompson, Mary, 257
Thornton, H. G., 661
Thornton, Helen, 123
Tomlinson, Helen, 257
Tuttle, Dorothy M., 260

Umbreit, W. W., 567
Upham, H. C., 261

Valleau, W. D., 122
Verwey, W. F., 258

Wagner, Morris, 119
Wakim, K. G., 119
Waksman, Selman A., 527, 531
Waldo, John F., 261
Ward, George E., 413
Ward, Walter E., 379
Washburn, Mary Jane, 255
Weaver, J. D., 383
Webb, Henry B., 429
Weiss, Lucille J., 119
Wheeler, Kenneth M., 351
White, J. C., 262
White, Jonathan W., Jr., 159
Wickerham, Lynferd J., 413
Wilder, C. J., 123
Will, Dessie W., 253, 261
Woods, W. V., 119
Worley, Gordon, Jr., 382
Wright, Lemuel D., 117
Wyss, Orville, 259

Yegian, Diran, 83
Young, Gerald, 383

Zimmerman, William H., 119
ZoBell, Claude E., 261

SUBJECTS

Acetylmethylcarbinol by *Aerobacter*, 259
— by *Salmonella cholerae-suis*, 498
Acid-fast bacteria, atypical, 347
Acid-fastness lost in tubercle bacteria, 83
Acidity, titratable, and pH in acid fermentations, 559
—, *see also* pH
Activated sludge process (title only), 120
Adaptation to high osmotic pressure, 24
Aerobacillus polymyxa, fermentations by, 116
Aerobacter making butylene glycol, 424
— producing acetylmethylcarbinol, 259
Agglutination, specific, of nodule bacteria, 661
Air-borne infection and ultraviolet, 257
Albumin, serum, for tubercle bacteria, 479
Alcohol oxidation by *Streptococcus mastitidis*, 515
Allergy, cytology and bacteriology of (title only), 380
Aminobenzoic acid, *see p*-Aminobenzoic acid
Amylase by *Endomycopsis*, 413
Antibiotic substances: chaetomin, 527, 531
— substances: penicillin levels in body fluids, 599, 603
— substances: *see also* Penicillin, Clavacin, Streptomycin, Streptothricin
Antiseptics for tubercle bacteria, 547

Anus obstruction affecting intestinal flora, 119
Artifacts in stained tubercle bacteria, 83
Arylamine formation by *Staphylococcus aureus*, 616, 628, 631
Arylamines from tryptophane, 631
Atypical acid-fast bacteria, 347
Azochloramid, action on hemolytic streptococci, 612
Azotobacter, flagellation of, 697
—, growth rate, 285
— respiration, affected by pH and minerals, 689

Bacillus macerans, identification of, 495
— *megatherium*, morphology of, 313
— *polymyxa*, identification of, 495
— *subtilis* produces butylene glycol, 261
Bacteriophage affecting dehydrogenase (title only), 261
— and serology of nodule bacteria, 670
—, dry, resistance to heat, age, humidity, acid, 243
—, drying method, 179
— for typing *Eberthella* strains, 379
— of *Aerobacter aerogenes*, 123
—, polyvalent, for dysentery bacteria, 179
—, stabilization of dry, 179, 243
Bacteriostasis by triphenylmethane dyes, 439
Bacterium coli, *see Escherichia coli*
Bacteroides, pleomorphism in, 125
Bacto phenol-red mannitol agar for pathogenic staphylococci, 555
Balantidium coli and bacteria, 123
Biotin requirement of yeasts, 385
Brewer's thioglycollate medium inadequate, 255
Bromthymol-blue lactose agar for pathogenic staphylococci, 555
Brucella growth and catalase inhibited by azide, 382
Bullis fever, 381
Butylene glycol by *Bacillus subtilis*, 261

Capsular polysaccharide, 31
Carbohydrate fermentation, micro method of, 491
Carbon dioxide requirement of meningococcus, 260
Carbonic anhydrase effect on pneumococcus, 77
Carotenoid pigments from mineral oil, 219
Cellulose-digesting bacteria in termites, 380
— fermentation, 499
Chaetomin, 527, 531
Chinese vetch nodule bacteria, 483
Citric acid fermented by streptococci and lactobacilli, 71
— acid fermented by *Streptococcus faecalis*, 455
Clavacin affecting tetanus toxin, 261
Clostridia, effect of sulfonamides on, 233
Clostridium pasteurianum, sugar and salt tolerance of, 13
— *perfringens*, antitoxin assay, 256
— *perfringens*, polysaccharide of, 31
Clover nodule bacteria, *see* Nodule bacteria
Coliform species, typical and atypical (title only), 255
— species, *see also Eberthella*
Colon-typhoid group, taxonomy of, 351
Conn, H. W., biography of (title only), 262
Corn oil oxidation, 1
Corynebacterium, study of genus, 295
Cross infection of *Rhizobium* of pea and clover, 673

Dehydrogenase affected by bacteriophage (title only), 261
— affected by quinine, 260
Desoxyribonucleic acid in acid-fast bacteria, 347
Detergents inhibiting yeast: zephiran, 677
Diastase by *Endomycopsis*, 413
Disinfectants for tubercle bacteria, 547
Drug resistance, acquisition of (title only), 383
Dyes causing bacteriostasis, 439
Dysentery bacteriophage, dry, stability of, 243
— bacteriophage, polyvalent, 179

Eberthella typhosa, typed by bacteriophage, 379
— varieties and *Proteus*, 382
Eggs as a medium for influenza virus, 369
Electron micrography and tyrothricin action (title only), 260
Electron microscopy compared with light microscopy, 313
Electrophoretic velocity and virulence, 537
Encephalitis in Texas (title only), 382
Encephalomyelitis virus, equine, 463

Endomycopsis fermenting starch, 413
Enterobacteriaceae, taxonomy of, 351
Enterococci in milk, 262
Equine encephalomyelitis virus, 463
Erwinia amylovora, electrophoretic velocity and virulence of, 537
Escherichia coli, growth with constant food supply, 579
— *coli*, population studies, 579

Fibrinolysis inhibited by penicillin, 253
Filtration affecting pH, 429
Flagellation of *Azotobacter*, 697
— of *Listeria monocytogenes*, 114
Flies raised aseptically, 120
Folic acid assay, species used, 611
— acid in media replaced by thymine, 201
Food poisoning by micrococci, 262
Food supply, effect on growth of *Escherichia coli* (*Bacterium coli*), 579

Gastrointestinal disturbances, bacterial findings, 259
— disturbances due to virus, 259
Gelatin, antigenic and pyrogenic effects of, 124
Gentian violet, antiseptic properties of, 439
Germicidal action and redox systems, 379
Gram stain and ribonucleic acid, 567
Growth factors of *Bacillus polymyxa* and *Bacillus macerans*, 495
— factors of *Escherichia coli*, mutation in, 401
— factors of streptococci, 117
— factors of yeasts, 385
Growth rate, direct and indirect methods, 285
Growth with constant food supply, 579
Guayule plants, aerobic decomposition of, 159

Hanson's bacilli *vs.* leprosy bacilli (title only), 380
Heat-treated bacteria, growth requirements of, 473

Icterogenic agent in yellow fever vaccine, 45
Influenza virus inactivated by ultraviolet, 447
— virus, inactive, interfering with active virus, 258
— virus multiplies in eggs, 369
Inositol requirement of yeasts, 385
Insects in canned vegetables (title only), 381
Intestinal flora after anus obstruction, 119
— flora and succinylsulfathiazole, 119
— flora and sulfaguanidine, 120

Jaundice from yellow fever vaccine, 45

L type colonies of *Bacteroides*, 125
Lactic fermentations, pH and titratable acid, 559
Lactobacilli fermenting citric acid, 71
Lecithinase of *Vibrio comma*, 155
Legume bacteria, *see* Nodule bacteria
Leishmania tropica, life cycle of (title only), 262
Leprosy bacilli *vs.* Hanson's bacilli (title only), 380
Lipolysis of corn oil, 1
Listeria monocytogenes, flagella of, 114

Maduromycosis (title only), 119
Malachite green as an antiseptic, 439
Malaria (title only), 120
Marine bacteria (title only), 261
Meningitis, pneumococcic (title only), 119
Meningococcus, carbon dioxide requirement of, 260
Microbic dissociation (title only), 262
Micrococci causing food poisoning, 262
Micro-glucide dish, 491
Mineral oil, source of carotenoid pigments, 219
Monosporium apiospermum (title only), 119
Mucoid bacteria from paper pulp, 211
Mutation of *Escherichia coli*, 401
Mycobacteria containing desoxyribonucleic acid, 347
— producing carotenoid pigments, 219
— producing pigment from *p*-aminobenzoic acid, 337
Mycobacterium tuberculosis, artifacts, 83
— *tuberculosis* producing pigments from *p*-aminobenzoic acid, 93
— *tuberculosis*, sensitivity to antibacterial substances, 547
— *tuberculosis*, serum albumin for, 479

Neisseria gonorrhoeae, culture methods, 255
— gonorrhoeae, selective bacteriostatic agents, 383

Nicotinic acid requirement of yeasts, 385
Nodule bacteria, cross infection between pea and clover, 673
— bacteria of Chinese vetch, 483
— bacteria, serological study of, 661
— bacteria, serology and phage resistance, 670
Nucleic acids from different acid-fast bacteria, 347
Nutrition of streptococci, 117
Nutritional state, infection and disease (title only), 257

Oil oxidation, 1
Ornithodoros ticks carrying relapsing fever, 609
Oxidation of corn oil, 1
Oxidation-reduction systems and germicidal activity, 379
Oxygen uptake, *see* respiration

p-Aminobenzoic acid causing pigment with *Mycobacterium*, 337
— acid derivatives affecting sulfonamides, 631, 683
— acid not formed by sulfonamide-resistant strains, 615, 625
— acid, source of pigments, 93
Pantothenic acid assay with bacteria, 119
— acid mediates tryptophane synthesis and oxidation, 631
— acid requirement of yeasts, 385
Paper pulp slime by coliform bacteria, 211
Pea nodule bacteria, *see* Nodule bacteria
Penicillia, habitat of, 120
Penicillin amounts from submerged and surface cultures, 646
— and gonococcus (title only), 383
— assay methods, 121, 256
— does not affect staphylococcus bacteriophage, 261
— does not affect tetanus toxin, 261
— formed by several fungi, 260
— identification, biological, 121
— in fibrinolysis, 253
— in superficial infections, 380
—, laboratory observations with (title only), 383
— levels in body fluids, determination of, 599, 603
—, mode of action of, 393
— production, variation of, 639
— resistance (title only), 383
— -resistant strains, 121
—, stability of several preparations, 380
— -sulfonamide therapy (title only), 119
— therapy, 122
Perfringens antitoxin assay, 255
Pertussis agglutination (title only), 119
— complement-fixing antibodies in normal guinea pigs, 257
— vaccine carried from mother to child, 257
pH affecting respiration of *Azotobacter*, 689
— affecting streptococcus fermentation, 455
— and titratable acidity in acid fermentations, 559
— changed by filtration, 429
Phage, *see* Bacteriophage
Pigment from *p*-aminobenzoic acid, 93
— from *p*-aminobenzoic acid by mycobacteria, 337
— in *Staphylococcus aureus*, requirements for, 495
Pigments, carotenoid, from mineral oil, 219
Pineapple spoilage, 25
Pleomorphism in *Bacteroides*, 125
— in *Mycobacterium*, 83
Pleuropneumonia-like organisms (title only), 119
Pneumococci affected by carbonic anhydrase, 77
Pneumococcic meningitis (title only), 119
Polysaccharide of *Clostridium perfringens*, 31
Population and food supply, *Escherichia coli* (*Bacterium coli*), 579
Preservatives, study of two, 255
Protein metabolism and infection (title only), 257
Proteus, biochemistry and serology of, 123
— *rettgeri* an *Eberthella*, 382
Pseudomonas riboflavina oxidizing riboflavin, 97
Pyridoxine requirement of yeasts, 385

Quinine affecting dehydrogenase, 260

Rabies antigen, methods of preparation, 379
Redox systems and germicidal activity, 379
Relapsing fever spirochetes recovered from *Ornithodoros* ticks, 609

Respiration of *Azotobacter* affected by pH and minerals, 689
Retting of guayule shrubs, 159
Rhizobium, *see* Nodule bacteria
Riboflavin not needed by yeasts, 385
—, oxidation by bacteria, 97
Ribonucleic acid and gram stain, 567
Rickettsial diseases (title only), 257
Rocky Mountain spotted fever vaccine, a film (title only), 120
Root nodule bacteria, *see* Nodule bacteria
Roots as a medium for animal pathogens, 122
— as a medium for plant pathogens, 122
Rosaniline, antiseptic properties of, 439
Rosenberger, R. C., obituary (title only), 258
Rubber from guayule, improved by retting, 159

Salmonella cholerae-suis producing acetylmethylcarbinol, 498
—, monophasic, isolated from diphasic cultures, 609
— *pullorum*, rapid identification, 255
Salt tolerance of bacteria, 7, 13
Seitz filter affecting pH, 429
Selective bacteriostatic agents for gonococcus, 383
Serological method for typing *Shigella*, 703
Serology of legume nodule bacteria, 661
Serum albumin as food for tubercle bacteria, 479
Shigella alkalescens fermenting sucrose, 497
—, serological method for typing, 703
Slime produced by coliform bacteria, 211
Sodium azide, fungistatic, fungicidal, toxic properties, 331
— azide inhibiting catalase of *Brucella*, 382
— azide medium for streptococci, 113
Staphylococci, selective media for pathogenic, 555
Staphylococcus aureus, requirement for pigment production, 496
— *aureus*, sulfonamide resistance of, 616, 628, 631
Staining producing artifacts, 83
Starch hydrolysis by *Endomycopsis*, 413
Sterility test methods inadequate, 255, 256
Streptococcal fibrinolysis and penicillin, 253
Streptococci attacking tyrosine, 191
— fermenting citric acid, 71
—, growth factors of, 117
—, growth requirements of, 191, 201
—, hemolytic, affected by sulfonamides and azochloramid, 612
—, hemolytic, distinction of, 263
— of group C, types of, 382
—, tellurite media for, 113
Streptococcus equisimilis, 267
— *faecalis* fermenting citric acid, 455
— *lactis* R same as *Streptococcus faecalis*, 611
— *mastitidis* oxidizing alcohol, 515
Streptomycin does not affect tetanus toxin, 261
Streptothricin-resistant strains of *Aerobacillus polymyxa*, 116
Succinylsulfathiazole and intestinal bacteria, 119
Sugar tolerance of bacteria, 13
Sulfaguanidine and intestinal bacteria, 120
Sulfanilamide inhibiting pigment formation, 93
Sulfonamide inhibition by substituted *p*-aminobenzoic acid, 683
— inhibitors, 233
— -penicillin therapy (title only), 119
— resistance and glucose metabolism, 623, 631
— resistance, cause of, 615, 623, 631
— resistance of *Staphylococcus*, due to tryptophane metabolism, 631
— resistance, mechanism of, 615, 623, 631
Sulfonamides, action on clostridia, 233
—, action on hemolytic streptococci, 612
— causing color in *Escherichia coli* cultures (title only), 258
—, effect on agglutinins (title only), 382
— in experimental infections (title only), 258

Tellurite medium for streptococci, 113
Termites harboring cellulose-digesting bacteria, 380
Tetanus toxin affected by penicillin, clavacin, streptomycin, 261
Thiamin requirement of yeasts, 385
Thymine as substitute for folic acid in media, 201
Titrations, biological (title only), 380
Triphenylmethane dyes causing bacteriostasis, 439
Tryptophane synthesis and oxidation mediated by pantothenic acid, 631

Tubercle bacteria, *see Mycobacterium tuberculosis*
Tuberculosis spreading prevented by ultraviolet, 258
Typhus transferred to rats by fleas, 381
Tyrosine decarboxylation by streptococci, 191

Ultraviolet rays and air-borne infection, 257
— rays inactivate influenza virus, 447

Vaccine transferred from mother to child, 257
Vetch, Chinese, nodule bacteria, 483
Vibrio comma and *Vibrio el tor*, lecithinase, 155
Virulence and electrophoretic velocity, 537
Virus, enterotropic, causing intestinal disease, 259
— inactivated by ultraviolet, 447
— suppressed by ultraviolet-inactivated virus, 258
Vitamin deficiency by succinylsulfathiazole feeding, 119
— deficiency in yeast media, 385
— requirements of *Bacillus polymyxa* and *Bacillus macerans*, 495

Wetting agents as preservatives, 255, 677
Wheat roots as a medium for animal pathogens, 122
— roots as a medium for plant pathogens, 122

X-rays causing mutation of *Escherichia coli*, 402

Yeast cells, budding, a film (title only), 120
—, growth factors of, 385
Yellow fever vaccine, 45

Zephiran inhibiting yeast, 677
